

The Revolution Story:

Revolution Plastics is based in Little Rock Arkansas, but has a big presence right here in Pope and Douglas Counties.

Revolution Plastics collects plastic silage bags/ bale wrap, marine/boat wrap and various horticultural films/drip tape and recycles it making high quality can liners from plastic that was destined for our landfills, or worse yet - burned on-site at farms would lead to air and water quality concerns. There are numerous locations right here in Pope and Douglas Counties that have Revolution Plastics dumpsters on their farms, marinas and businesses. Last year in Pope/Douglas Counties - Revolution collected over 54,000 lbs of plastic!

Revolution Plastics sister company, Revolution Bags, creates the highest recycled content and dependable can liners on the market. Do your part by purchasing these liners that help our farmers and businesses to continue their recycling efforts.

All Revolutions Bags contain 30-97% post-consumer recycled content resin. More than 1 billion pounds of collected film/wrap/bags have been diverted from the landfills to date.

If you would like for your facility to begin using Revolution Bags trash can liners, please contact Micah Hanson, your local Cole representative in Alexandria, MN.
